

SUPERIOR CONSTRUCT GROUP, LLC

Government Capability Statement

COMPANY OVERVIEW

Superior Construct Group (SCG) is a Maryland-based MBE-driven general contractor and engineering-led construction firm specializing in commercial, institutional, healthcare, multifamily, and residential projects. SCG combines licensed engineering expertise, commissioning, building performance, and construction management to deliver high-quality, energy-efficient, and code-compliant projects from concept through closeout.

CORE CAPABILITIES

- General Contracting (Commercial, Institutional & Residential)
- MEP-Focused Construction and Coordination
- Commissioning (Cx), Building Envelope Commissioning (BECx), Retro-Commissioning
- Construction Management & Owner Representation
- Tenant Fit-Outs and Interior Renovations
- Kitchen, Bathroom & Basement Renovations
- Energy Audits, Facility Assessments, Benchmarking & MEP Upgrades
- Quality Assurance / Quality Control (QA/QC)
- Mechanical, Electrical & Plumbing System Optimization

DIFFERENTIATORS

- Engineering-led contractor with 28+ years of MEP, commissioning and building performance expertise.
- Performance-AI driven approach focused on long-term building operation, not simply construction.
- Licensed Professional Engineer leadership and nationally recognized commissioning credentials.
- Strong QA/QC, documentation, functional testing and closeout procedures.
- Small-business responsiveness with large-project technical capability.
- Pending MBE/SBE/DBE/8(a) certifications supporting supplier diversity goals.

PAST PERFORMANCE EXPERIENCE

- Educational Facilities
- Healthcare & Medical Offices
- Commercial Office Buildings
- Government & Institutional Facilities
- HVAC Modernization
- Facility Upgrades & Energy Improvements

- 28+ years of engineering, commissioning, sustainability and construction leadership.
- Licensed Professional Engineer (Maryland) with additional reciprocity in progress.

WHY SCG

SCG bridges the gap between engineering and construction. Our team understands how buildings are designed, constructed, commissioned, and operated, enabling us to reduce risk, improve quality, lower operating costs, and deliver facilities that perform as intended.
